

ON JULY 16, 1945, THE UNITED STATES OF AMERICA CARRIED OUT THE  
WORLD'S FIRST NUCLEAR TEST.

AS THE FIRST TO TEST NUCLEAR WEAPONS AND THE FIRST TO USE THEM TO  
KILL HUNDREDS OF THOUSANDS OF PEOPLE, THE USA MUST TAKE THE  
INITIATIVE TO COUNTERACT THIS TERRIBLE LEGACY.

## What?

A "**No First Use**" (NFU) policy is a commitment to not use nuclear weapons first.

Currently, the White House could use **nuclear weapons at any time for any purpose** - such as deterring chemical, biological, or cyber attacks.

# NO FIRST USE

## Why?

Reduce the threat of nuclear war based on misunderstanding

## Bills in Congress

**H.R.2603**  
**S.1219**

If the United States' nuclear-armed adversaries believe we may use nuclear weapons against them, they may use their nuclear weapons early in a crisis, even if they misunderstand the intention behind a U.S. action.

Email your members of Congress!
